

DISTRACTED DRIVER NOTICE

WHEN LIFE HAPPENS... DON'T BE A DISTRACTED ADULT

A change in daily routine, lack of sleep, stress, fatigue, cell phone use, and simple distractions are some things parents experience and can be contributing factors as to why children have been left unattended in vehicles...

Distraction Prevention Tips:

- Never eat, drink, or use your cell phone while driving.
- Make a habit of using your hand and feet to control the vehicle.
- Do not use your cell phone while driving, even if you are not holding it.
- Create a distraction-free zone in your vehicle.

Facts About Heatstroke:

- It can take up to 15 minutes to heat up a sleeping child in a vehicle.
- Even with windows cracked, a vehicle can reach dangerous temperatures.
- The body temperature of a child can rise to 103°F in 15 minutes.

During the 2018 legislative session, a new law was passed that requires child care facilities, family day care homes and large family child care homes to provide parents, during the months of April and September each year, with information regarding the potential for distracted adults to fail to drop off a child at the facility/home and instead leave them in the adult's vehicle upon arrival at the adult's destination.
